

Experiment 9

Form Validation using Validator.js

Aim

To design a responsive input form that validates user data (specifically email and phone numbers) and displays real-time error messages using HTML, CSS, and JavaScript with the **Validator.js** library.

Components & Tools

- **Frontend:** HTML5, CSS3
- **Logic:** JavaScript
- **Library:** Validator.js

Implementation

1. HTML Structure (index.html)

This file sets up the structure of the form, including specific `<span>` tags to hold error messages.

HTML

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <title>Stylish Form Validation</title>
5
6    <style>
7      body {
8        margin: 0;
9        height: 100vh;
10       font-family: 'Segoe UI', sans-serif;
11       display: flex;
12       justify-content: center;
13       align-items: center;
14       background: linear-gradient(135deg, #667eea, #764ba2);
15     }
16
17     .container {
18       background: rgba(255, 255, 255, 0.1);
19       padding: 30px;
20       border-radius: 15px;
21       backdrop-filter: blur(10px);
22       box-shadow: 0 8px 25px rgba(0,0,0,0.2);
23       width: 300px;
24       text-align: center;
25     }
26
27     h2 {
28       color: white;
29       margin-bottom: 20px;
30     }
31  </style>
32 </head>
33 </html>
```

```

32     input {
33         width: 90%;
34         padding: 10px;
35         margin: 10px 0;
36         border: none;
37         border-radius: 8px;
38         outline: none;
39         font-size: 14px;
40     }
41
42     input:focus {
43         box-shadow: 0 0 5px #fff;
44     }
45
46     button {
47         margin-top: 15px;
48         padding: 10px;
49         width: 100%;
50         border: none;
51         border-radius: 8px;
52         background: #ffffff;
53         color: #764ba2;
54         font-weight: bold;
55         cursor: pointer;
56         transition: 0.3s;
57     }
58
59     button:hover {
60         background: #ddd;
61     }

```

```

62
63     #error {
64         margin-top: 10px;
65         font-weight: bold;
66     }
67 </style>
68 </head>
69
70 <body>
71
72 <div class="container">
73     <h2>🌟 Validate Your Info</h2>
74
75     <form id="myForm">
76         <input type="text" id="email" placeholder="Enter Email">
77         <input type="text" id="phone" placeholder="Enter Phone Number">
78         <button type="submit">Submit</button>
79     </form>
80
81     <p id="error"></p>
82 </div>
83
84 <script>
85 document.getElementById("myForm").addEventListener("submit", function(e) {
86     e.preventDefault();
87
88     let email = document.getElementById("email").value;
89     let phone = document.getElementById("phone").value;
90     let error = document.getElementById("error");
91

```

```
92     let emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;
93     let phonePattern = /^[0-9]{10}$/;
94
95     if (!email.match(emailPattern)) {
96         error.style.color = "#ff4d4d";
97         error.innerText = "✖ Invalid Email";
98     } else if (!phone.match(phonePattern)) {
99         error.style.color = "#ff4d4d";
100        error.innerText = "✖ Invalid Phone Number";
101    } else {
102        error.style.color = "#00ffcc";
103        error.innerText = "✓ Valid Input";
104    }
105 });
106 </script>
107
108 </body>
109 </html>
```

2. Styling (style.css)

Used to provide a clean layout and highlight error messages in red.

CSS

```

1  body {
2      margin: 0;
3      height: 100vh;
4      font-family: 'Segoe UI', sans-serif;
5      display: flex;
6      justify-content: center;
7      align-items: center;
8      background: linear-gradient(135deg, #667eea, #764ba2);
9  }
10
11  .container {
12      background: rgba(255, 255, 255, 0.1);
13      padding: 30px;
14      border-radius: 15px;
15      backdrop-filter: blur(10px);
16      box-shadow: 0 8px 25px rgba(0,0,0,0.2);
17      width: 300px;
18      text-align: center;
19  }
20
21  h2 {
22      color: white;
23      margin-bottom: 20px;
24  }
25
26  input {
27      width: 90%;
28      padding: 10px;
29      margin: 10px 0;
30      border: none;
31      border-radius: 8px;
32      outline: none;
33      font-size: 14px;

```

```

34  }
35
36  input:focus {
37      box-shadow: 0 0 5px #fff;
38  }
39
40  button {
41      margin-top: 15px;
42      padding: 10px;
43      width: 100%;
44      border: none;
45      border-radius: 8px;
46      background: #ffffff;
47      color: #764ba2;
48      font-weight: bold;
49      cursor: pointer;
50      transition: 0.3s;
51  }
52
53  button:hover {
54      background: #ddd;
55  }
56
57  #error {
58      margin-top: 10px;
59      font-weight: bold;
60  }

```

3. Logic (script.js)

This script intercepts the form submission to validate inputs using the validator object.

JavaScript

```

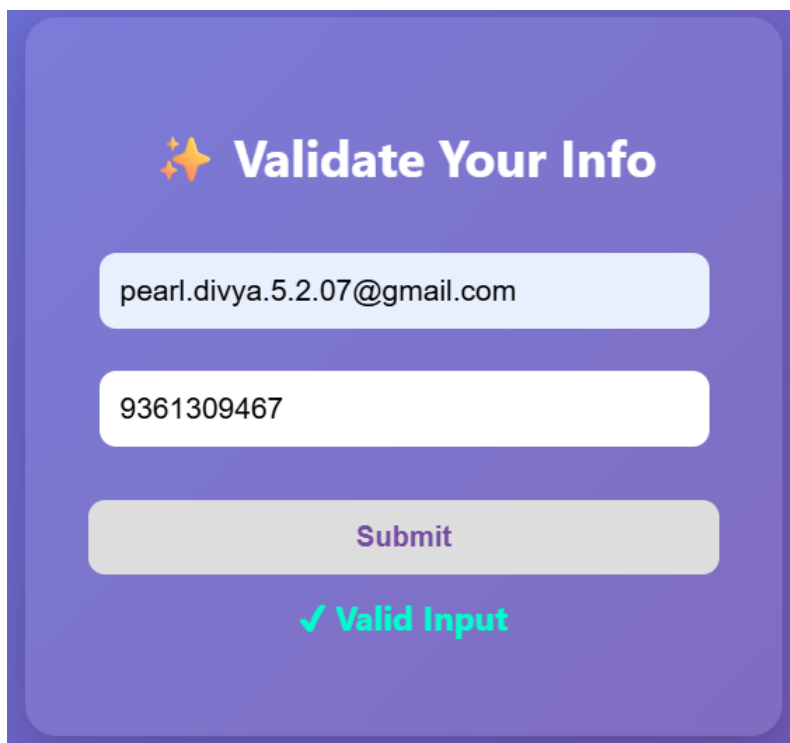

1  document.getElementById("myForm").addEventListener("submit", function(e) {
2      e.preventDefault();
3
4      let email = document.getElementById("email").value;
5      let phone = document.getElementById("phone").value;
6      let error = document.getElementById("error");
7
8      let emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;
9      let phonePattern = /^[0-9]{10}$/;
10
11     if (!email.match(emailPattern)) {
12         error.style.color = "red";
13         error.innerText = "✗ Invalid Email";
14     } else if (!phone.match(phonePattern)) {
15         error.style.color = "red";
16         error.innerText = "✗ Invalid Phone Number";
17     } else {
18         error.style.color = "green";
19         error.innerText = "✓ Valid Input";
20     }
21 });

```

Output:

Valid Input

Form submits and logs "Email: [user@email.com]" and "Phone: [number]" to the console.

✦ **Validate Your Info**

pearl.divya.5.2.07@gmail.com

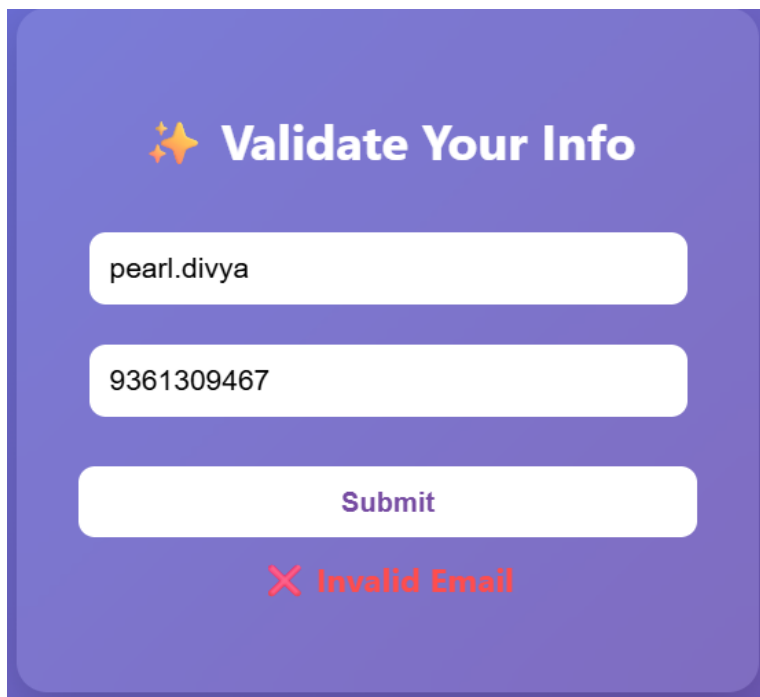

9361309467

Submit

✓ Valid Input

Invalid Email

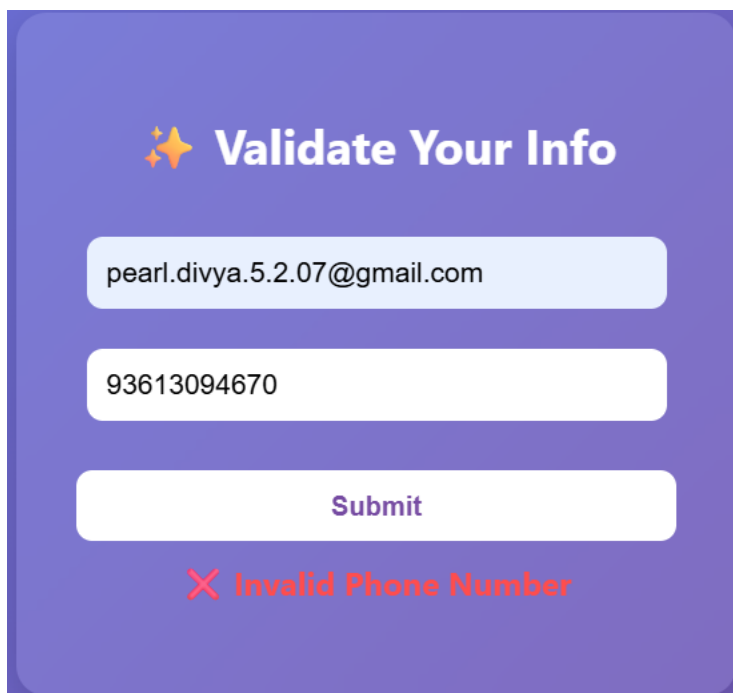

Displays: *"Please enter a valid email address."* below the email field.

A purple rectangular form with rounded corners. At the top, it has a title "Validate Your Info" with a yellow star icon to its left. Below the title are two white input fields. The first field contains the text "pearl.divya". The second field contains the text "9361309467". Below these fields is a white "Submit" button. At the bottom of the form, there is a red error message: "Invalid Email", preceded by a red 'X' icon.

Invalid Phone

Displays: *"Please enter a valid phone number."* below the phone field.

A purple rectangular form with rounded corners. At the top, it has a title "Validate Your Info" with a yellow star icon to its left. Below the title are two white input fields. The first field contains the text "pearl.divya.5.2.07@gmail.com". The second field contains the text "93613094670". Below these fields is a white "Submit" button. At the bottom of the form, there is a red error message: "Invalid Phone Number", preceded by a red 'X' icon.
